

**Kellquin Botanicals**  
Exercii Perfectioni

## Our Mission

To establish and produce a consistent and sufficient supply of top-quality plant-based products for the local and international cosmetic, medicinal and nutritional markets.

Our goal is to encourage the use of alternative plant-based products in the development of cosmetics, pharmaceuticals, herbal and food supplements by contributing to the establishment and cultivation of plant species with cosmetic, medicinal and nutritional properties. We therefore provide the opportunity to invest in an economically viable and profitable farming initiative, while not only promoting the preservation of traditional plant use knowledge but also alleviating the impact of overharvesting on wild plant populations.

## About Us

Kellquin Botanicals (Pty) Ltd is an agri-botanical specialist consultancy who focuses on delivering planning, implementation and management services to farmers, pharma-nutraceutical companies and financial investors relating to the cultivation, harvesting and processing of plants with cosmetic, medicinal and nutritional value, including essential oils.

We are a multifaceted team of specialists with ample experience in this sector, working together with key stakeholders to capitalize on our rich plant diversity and its unique properties through the sustainable development of profitable farming initiatives while promoting the importance of alternative plant use.

We specialize in a wide variety of plant species, amongst others *Artemissia afra*, *Lippia javanica*, *Moringa oleifera*, *Sceletium tortuosum* and *Sutherlandia frutescens*, and essential oils such as Lavender, Lavandin and Rose geranium.

# Kellquin Botanicals

Specialists in the Cultivation, Harvesting and Processing of Plants with Cosmetic, Medicinal and Nutritional Value

## Our Team

### Lizande Kellerman

Lizande has more than 15 years' experience in integrated environmental assessment and management studies, primarily in planning, managing and conducting agricultural, ecological and environmental assessments. Lizande has also more than 12 years' experience in the planning, design, establishment, implementation, operational management and financial administration of various agricultural projects that focused on the sustainable propagation, cultivation, harvesting and processing of essential oils and indigenous plant crops with cosmetic, medicinal and nutritional value across South Africa. She specializes in applications for environmental authorization that include biodiversity and bioprospecting permits, and licensing and registrations for ploughing rights, water use and waste management. Lizande holds a BSc degree in Zoology and Entomology, with an Honours and Masters in Botany from the University of Pretoria. She is also a registered Professional Natural Scientist with the South African Council for Natural Scientific Professions (SACNASP) (Reg. No. 400046/10 – 'Botanical Sciences').

### Quintus Slabbert

Quintus Slabbert has more than 35 years' experience in pilot, small- and commercial scale farming and agri-processing of numerous cash crops, essential oils and indigenous plant species with cosmetic, medicinal and nutritional value across southern Africa. His expertise includes inter alia land tenure negotiations, soil preparation, infrastructure development (incl. processing facilities, nurseries, etc.), irrigation installations and scheduling, fertilization, fertigation and crop protection, propagation, cultivation and harvesting of plant crops, processing of harvested plant material (incl. chopping, drying, grinding, milling, distillation, etc.), procurement and maintenance of farming equipment, implements and machinery, administrative and financial management, contracting, mentoring and training of staff, occupational health and safety procedures, organic certification processes, implementation of Good Manufacturing Practices (GMP) and Hazard Analysis Critical Control Points (HACCP), as well as quality assurance, marketing, sales and business development.

## What We Do
